Big Numbers – Let's Learn

شرح الدرس

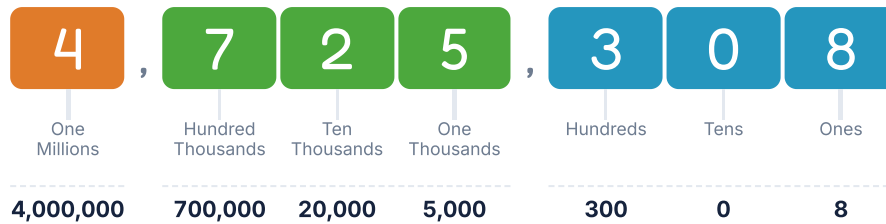

1

Place value and value

القيمة المكانية وقيمة الرقم

Every digit sits in a **place**. Its **value** depends on that place.

كل رقم له **موقع**، و**قيمتته** تعتمد على موقعه.

REMEMBER · احفظ

Place value = the NAME of the place · Value = the NUMBER the digit is worth.

القيمة المكانية = اسم المنزل · قيمة الرقم = العدد الذي ييساويه.

EGYPT

The Great Pyramid of Giza was built from about **2,299,960** blocks of stone.

الهرم الأكبر بالجيزة اتبنى من حوالي 2,299,960 كتلة حجرية.

2,299,960
BLOCKS

WATCH OUT! · خلي بالك

The value of **0** is always **0**, in any place.

قيمة الصفر دايقا صفر، في أي منزلة.

TRY IT · جرّب بنفسك

2 Periods

المجموعات

Digits are grouped in **threes** from the right. Each group is a **period**, and each period has ones, tens and hundreds.

الأرقام بتتجمع كل 3 من جهة اليمين. كل مجموعة اسمها **مجموعة**، وكل مجموعة فيها آحاد وعشرات ومئات.

← split into groups of 3 digits, starting from the RIGHT · قسم لمجموعات من 3 أرقام من جهة اليمين

MILLIARDS			MILLIONS			THOUSANDS			ONES

- How many digits are in each period?
- Which period has no name when you read it?

Answers: 1) 3 · 2) The Ones period

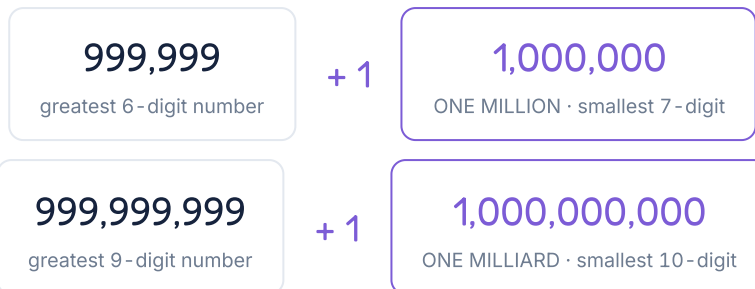

3 Million and Milliard

Add **1** to the greatest number of a size and you get a brand-new period.

لما تضيف 1 لأكبر عدد، بتفتح مجموعة جديدة خالص.

EGYPT

The population of Egypt is about **107,000,000** people — that is more than one hundred **million**. Lake Nasser, behind the High Dam, holds about **132,000,000,000** m³ of water — that is more than one hundred **milliard**.

عدد سكان مصر حوالي 107,000,000 نسمة، وبحيرة ناصر خلف السد العالي يتسع حوالي 132,000,000,000 متر مكعب مياه.

107,000,000
PEOPLE

خلي بالك · WATCH OUT!

Million is the smallest **7**-digit number. **Milliard** is the smallest **10**-digit number. Count the zeros, not the commas!

المليون أصغر عدد من 7 أرقام، والمليار أصغر عدد من 10 أرقام.

جرب بنفسك · TRY IT

1. One million is the smallest number formed from ——— digits.
2. One milliard is the smallest number formed from ——— digits.

Answers: 1) 7 · 2) 10

4 How to read a big number

إزاي تقرأ عدد كبير

STEP 1 – Split

Split the number into periods of 3 digits, starting from the right.

قسّم العدد لفترات كل واحدة 3 أرقام، وابدأ من اليمين.

STEP 2 – Read

Read each period as a normal 3-digit number.

اقرأ كل فترة كأنها عدد عادي من 3 أرقام.

STEP 3 – Name

Say the name of the period after it. The Ones period has no name.

قول اسم الفترة بعدها. فترة الآحاد ملهاش اسم.

82,405,613 → 82 **million**, 405 **thousand**, 613 = Eighty-two million, four hundred five thousand, six hundred thirteen.

٨٢ مليوناً، ٤٠٥ آلاف، ٦١٣.

EGYPT

The area of Egypt is about **1,010,000** km². Read it: one million, ten thousand.

مساحة مصر حوالي 1,010,000 كيلومتر مربع — تُقرأ: مليون وعشرة آلاف.

1,010,000

TRY IT · جرّب بنفسك

1. Read 3,506,247,190 in the short way.
2. Write in figures: 7 million, 60 thousand, 4.

Answers: 1) 3 milliard, 506 million, 247 thousand, 190 · 2) 7,060,004

5 The same digit – different value

نفس الرقم بقيمة مختلفة

Move a digit **one place to the left** and its value becomes **10 times** bigger.

لما الرقم يتحرك منزلة واحدة لليسار، قيمته تبقى 10 أضعاف.

One Millions	6,000,000	×10 ↑
Hundred Thousands	600,000	×10 ↑
Ten Thousands	60,000	×10 ↑

Answers: 1) 60,000 · 2) 10

أكبر وأصغر عدد

6 Greatest and smallest numbers

Use **every** digit once. Order them to build the number you want.

استخدم كل رقم مرة واحدة، ورتبهم حسب اللي عايزه.

GREATEST · أكبر عدد

9 8 5 3 2 1 0

9,853,210

Put the digits from biggest to smallest.
رتب الأرقام من الأكبر للأصغر.

SMALLEST · أصغر عدد

1 0 2 3 5 8 9

1,023,589

Smallest to biggest — but **0 can never be first**.
من الأصغر للأكبر — والصفر ما يفعش يبقى أول رقم.

WATCH OUT! · خلي بالك

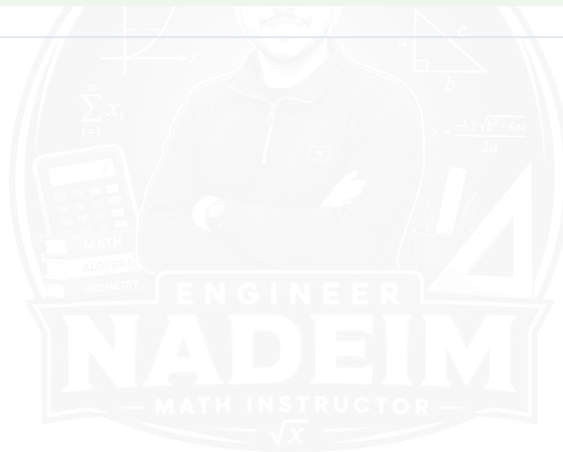

If **0** is one of the digits, swap it with the next smallest digit — a number cannot start with 0.

لو الصفر من ضمن الأرقام، بدله باللي بعده — العدد ما يبدأش بصفر.

ACCESS Exploring Place Value

Talk with your Shoulder Partner. Record what you remember about the place value system from earlier grades. Be prepared to share your thinking with the class.

تحدث مع زميلك المجاور، سجل ما تتذكره عن نظام القيمة المكانية من الصفوف السابقة، واستعد لمشاركة أفكارك مع الفصل.

BUILD Reading the Place Value Chart

Use the place value chart to help you read the number aloud with your teacher. Write numbers in the place value chart with your teacher. The first one is done for you.

استخدم جدول القيمة المكانية لقراءة العدد بصوت عالٍ مع معلمك، ثم اكتب الأعداد في الجدول، الأول تم حله لك.

MILLIARDS	MILLIONS			THOUSANDS			ONES		
O	H	T	O	H	T	O	H	T	O

**HANDS-ON ACTIVITY** Creating Big Numbers

Practice creating, reading, and comparing really big numbers.

تدرب على تكوين وقراءة ومقارنة الأعداد الكبيرة جدًا.

1. Place all digit cards face down in the middle and mix them up.
2. One person in the group turns over a digit card. Each player independently decides which place value to put the digit in and records the digit in their own place value chart.
3. The next student turns over a card. Each player independently decides which place value to put the digit in and records the digit in their own place value chart.
4. Repeat until all spaces in the row have been filled. Then, players compare their numerals. The player with the greatest numeral wins a point. There is room to play 5 rounds.

اقلب بطاقات الأرقام واخبطها. كل جولة يقلب طالب بطاقة، ويقرر كل لاعب بمفرده في أي منزلة يضع الرقم داخل جدولته. كرر حتى يمتلئ الصف، ثم قارنوا الأعداد — صاحب أكبر عدد يكسب نقطة. لعب 5 جولات.
